

As a U.S Cititzen living in Indiana, I would like to fully endorse the programs the State as done to help protect my privacy.

I have a phone because I choose to have one. It is not a right nor is it a right for others to use it. It is MY priviledge. My phone number is PRIVILEGED information which I choose to give out. However, it is sometimes required information (credit cards etc) . . .which I provide to them for my purposes . . .and they then sell to others. This violates my privacy and my intent.

Please do not usurp states rights or those of my own to only provide my personal information to those I choose to have it.
